

# PARENTS. THE DECISION IS YOURS!

Parents, as affirmed in Louisiana Children's Code, you have the paramount right to determine the appropriate medical and preventative healthcare for your children - NOT the STATE and NOT the CDC!!

[bit.ly/lachildrencode](http://bit.ly/lachildrencode)

Just like COVID-19 vaccines, masks are under Emergency Use Authorization (EUA).

[fda.gov/media/137121/download](http://fda.gov/media/137121/download)

Federal law states an individual has the "right to refuse" an experimental medical intervention under EUA. [tinyurl.com/euafederallaw](http://tinyurl.com/euafederallaw)

Last school year, federal law was broken and your child's rights were violated when you were not made aware:

- that masks are a medical intervention under EUA;
- of the significant known risks of wearing a mask;
- of the RIGHT TO REFUSE; and
- of the appropriate monitoring and reporting of adverse events associated with masking.

Last school year, parental rights were violated when the State determined what is best for your children.

Last school year, medical ethics were violated when an untested medical intervention was forced on weaker members of society to "protect adults".

There is no industry standard for masks. Scientists are raising concerns for the future implications of inhaled nano-particles from long-term mask wearing by children.

There is no evidence that long-term mask wearing by children is safe in regards to mental or physical health, and that it does not impact learning or brain function. Where are the safety studies?

Article I, Section 20 of our State's Constitution recognizes and affirms our right to not be tortured. [bit.ly/laconarticle1](http://bit.ly/laconarticle1)

Article I, Sections 3 and 12 prohibit discrimination based on "physical condition." Healthy children should not be masked, discriminated against, or ostracized. [bit.ly/laconarticle1](http://bit.ly/laconarticle1)

HEALTHFREEDOMLA.ORG

## Notice to school administration:

My child will not be wearing a mask in school this year. Recommendations from the CDC and Louisiana Department of Health are just that: recommendations. After evaluating the data and considering the best possible health outcome for my child, I have determined that masking is not in his/her best interest and most likely will cause him/her significant harm.

I do not hold the school liable in the instance that my child should contract COVID-19.

We will continue to responsibly evaluate my child's health and keep him/her home if feverish.
